BusinessNet Connect

Do you need to easily interconnect company's accounting system with bank's systems? Do you need to automate your processes for payment services? BusinessNet Connect offers a reliable and robust solution for your company.

BusinessNet Connect provides

- Downloading of daily electronic statements (MT940 format).
- Downloading of electronic statements with intraday movements (MT942 format).
- Downloading of files with information about account balances (CSV format).
- Uploading of domestic, foreign and SEPA payment files (SEPA transfer and direct debit) – supported file format, see BusinessNet Connect Integration Document.

Benefits of using BusinessNet Connect

- Make the pairing of incoming transactions with the accounting system fast and effective. Incorporate automated statements download as a part of your company's processes.
- Make the access to sensitive data about transactions privileged. Choose mandatory file content encryption for all downloaded statements and authorize only the chosen employee to decrypt the content.
- Make your payment processes faster and minimize the risk of the internal fraud. Use automated payment files upload.
