

How to activate your card?

By paying at a merchant

Insert your card into the terminal and enter your PIN.

At an ATM

Withdraw cash or inquire about your balance.

- **Contactless payments** are activated with the first PIN-confirmed transaction after inserting the card into the merchant's terminal or by withdrawing from an ATM.
- Activate your card when you know your PIN.

You have a new **PIN for the new or reissued card** after blocking.

The **PIN for the renewed card** remains the same as for your original card.

A large, light gray stylized arrow pointing to the right, composed of two overlapping shapes.

A better card for a better world

Convenient payments

Pay by mobile or watch

Apple Pay or Google Pay make paying easier and safer. Just add your payment card to your mobile phone or smartwatch. Quick instructions are available at www.unicreditbank.sk/platbymobilom.

Recurring payments

Do you use your existing card to pay for subscription services such as streaming platforms or any other recurring payments? Keep in mind that you will need to **remove the original card and add a new one** with your service provider.

Your finances always at hand

Smart Banking

With our Smart Banking app, you have a perfect overview of your finances and cards anytime, anywhere. For example, you can view your PIN or current statement, make a payment or set transaction limits in just a few clicks.

What you need to know

Surcharge for using the card and Dynamic Currency Conversion

When using your card abroad, you may encounter Dynamic Currency Conversion (DCC) or a surcharge for using your card at a merchant or ATM, which may not be convenient for you. For more information, please scan the QR code.
